GOLDEN SPEECH AT NORTHAMPTON FLAYS DEMOCRATS

(Continued from Page 1.)

people, under an agreement, meeting every duty, to preserve the peace of the world, always with unyielding Americanism—under such a leader, such a cause I would follow.

Must Stifle Discard.

"No one in public life can be oblivious to the organized efforts to undermine the faith of our people in their government, foment discord, aggravate industrial strife, stifle production and ultimately stir up revolution. The first duty of the government is to repress them, punishing willful violations of law. Turning the full light of publicity on all abuses of the right of assembly and of free speech and it is the first duty of the public press to expose false doctrines and answer sedition arguments. American institutions can stand discussion and criticism only if those who know bear them the testimony of the truth. Such repression and such testimony should be forthcoming that the uninformed may come to a full realization that their sedition efforts are not for their welfare, but for their complete and economic and political destruction.

"The greatest need of the nation at the present time is to be rescued from all the reactions of the war. The chief task that lies before us is to repossess the people of their government and their property. We want to return to a thoroughly peace basis because that is the fundamental American basis. Unless the government returns to a peace basis, the property of the people and the hope of America goes down in ruins.

Must Reduce Prices.

"If the great conflict has disturbed our political conditions, it has caused upheaval in our economic relations. The mounting prices of all sorts of commodities have put a well-nigh unbearable burden on every home. Much of this is beyond relief from law, but the forces of the government can and must afford a considerable remedy.

"The most obvious place to begin retrenchment is by eliminating the extravagance of the government itself. That great breeder of public and private extravagance, the excessive profits tax, should be revised and resources had to customs taxes on imports.

"A revision of taxation must be accompanied with a reduction of that private extravagance which the returns from luxury taxes reveal as surpassing all comprehensive taxation.

"Profiteering should be punished because it is wrong. This class profits by scarcity but they do not cause it. The difficulty is caused by scarcity of material and abundance of money and insufficient production. Production must be increased.

"One of the hindrances to production is lack of adequate railroad facilities. Transportation must be re-established. There must be a different public attitude toward industry, a larger comprehension for their interdependence, capital, management and labor and the better facilities for the prompt and reasonable adjustment of industrial disputes.

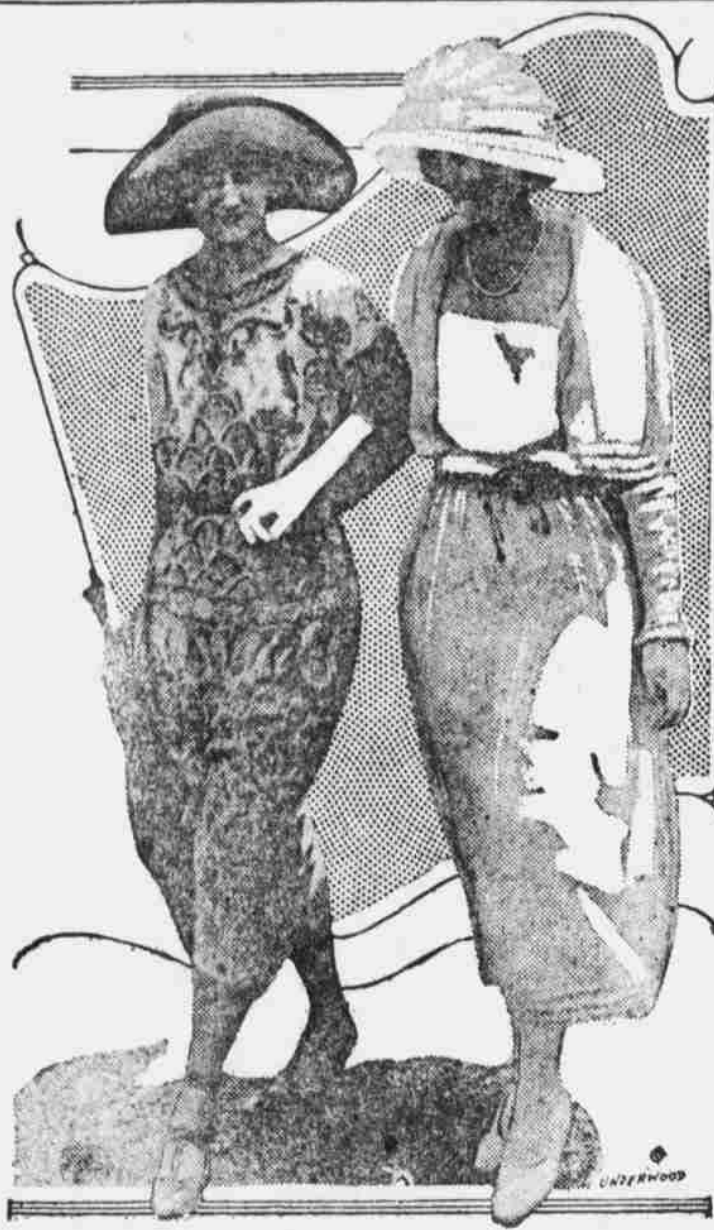

"The farmers need an enlarged power of organization, whether they be organized or not, to a larger degree by the high prices paid for their produce by the ultimate consumer at the same time decrease the cost of food.

"But all these difficulties depend for final solution on the character and moral force of the nation. Unless these forces abound and manifest themselves in work done, there is no real remedy.

"There is especially due to the colored race a more generous and just consideration of their constitutional rights. Tempted with disloyalty, they remained loyal, serving in the military forces with distinction, obedient to the draft to the extent of hundreds of thousands, investing in Liberty bonds, surely they hold the double title of citizenship by birth and by conquest, to be defended from lynching and to be freely equal suffrage, for which I have always voted, is coming. The party stands pledged to use its endeavor to hasten ratification, which I trust will be at once accomplished.

"The destiny, the greatness of America lies around the hearthstone. If theft and industry are taught there, and the example of self-sacrifice appears, if honor abides there and high ideals, if there the building of fortune and the government of the future are good government, at home and abroad, peace, respect and confidence, there are these virtues, then, the blessings look well, then, to the hearthstone, therein all hope for America lies."

SOCIAL LEADERS AT NEWPORT

Mrs. Joseph W. Frazer, left, and Miss Catherine Lawrence snapped at Newport, society's favorite summer resort.

The annual pilgrimage of the elite of the nation to Newport, R. I., is well under way, and that famous watering place is thronged with famous folk who are displaying the most unusual and wonderful creations in the new summer fashions. The photograph shows Mrs. Catherine Lawrence wearing a pale green organza frock trimmed with white organza, and a white organza hat that completes her costume. With her is Mrs. Joseph W. Frazer, wearing a one-piece frock of white tulle and silk embroidered in an intricate all-over design. The photograph shows Mrs. Catherine Lawrence wearing a pale

GERMANS SCORN GREAT IDEALS

Spirit of Republicanism Dies. Caste and Class Win in Reichstag.

BY FRANK E. MASON.
Staff Correspondent International News Service.

BERLIN, July 27.—The spirit of republicanism is dying in Germany. Caste and class triumphed; the ideals of equality and democracy were defeated at the Reichstag elections. Messrs. Barber, Baker, Banker and Bootblack went to the polls and registered their protest against patterning the German government after the principles and ideals of the United States republic.

Germans vote for parties, not for candidates; the party's victory or defeat is purely a matter of the people's approval or disapproval of its platform. The Reichstag election may be compared to three salesmen attempting to create a desire to sell their system of government to the voters. The governments on trial were the United States, English and Russian. The United States republican ideals of democracy lost; the monarchy of England and class dictatorship of Russia won.

Like English Style.

The reactionary national and people's parties, from whose ranks were recruited the Knapp revolutionists, wish to see the return of a monarchy patterned on English lines. With it would come the British parliamentary system. The hierarchy of nobility would again be officially recognized, as in England. The nationalists feel the need of a king in their German blood. The people's party is not actuated so much by sentimental notions of royalty as by the desire for a stable government to protect the "big interests." They contend the British system best answers this purpose.

The German democratic ideas on government most closely of any German party approach those of an American. He is opposed to caste or class distinctions. He believes in representative and majority rule in a republican government. Many of the democratic leaders have made extended visits to America and have a keen appreciation of American politics. The other moderates in the old coalition, the Catholic center, and the majority socialists

have much in common with Americans in their point of view.

The independent socialists, with their program of revolutionary sovietism in every industry electing a supreme soviet, or "rat," their slogan "Dictatorship of the Proletariat" and "Hoch die Volkrevolution," are disciples of the Russians.

Democracy Out of Date.

"The independent call democracy an antiquated notion, as much out of fashion as despotic kings, and preach class prejudice. Freedom is not included in their platform; they would have a dictatorship which would permit committees of workers to regulate and order the lives of classes in matters now considered the industrial's personal liberty. Nearly five million Germans voted

GERMANS WOULD BAR U. S. ADDING MACHINES

BERLIN, July 27.—German manufacturers of adding machines are appealing to the government for assistance in their fight to prevent the importation of American-made machines, which they claim now are superfluous, as the German industry is capable of supplying the home demand.

Action has been precipitated by the application of a well-known American firm through its Berlin branch for permission to import 1,700 adding machines to meet the German demand until the

American firm has completed its local branch factory.

The German manufacturers have addressed a joint appeal to the ministry of economics demanding further enforcement of the existing import embargo and requesting that wholesale importation should be prohibited.

The Vorwaerts declares that, while the German working man does not desire to be placed under the domination of American capital, the present action by the German masters is undignified and not in keeping with the German efficiency which has always been able to assert itself in the competitive markets even when pitted against American enterprise.

Church Membership Slumps In Hunland; Dodge Church Taxes

BERLIN, July 27.—So great is the falling off in church membership here that the Berlin synod of the German Lutheran church has voted to take drastic measures against persons who withdraw. Reports read at a recent meeting of the synod showed that while in 1915 there were only 25 defections, the number last year reached 5,287. As many women as men withdrew, most of them being young, and the majority members of the social democratic party.

The synod resolved that all those withdrawing should be excluded from the privileges of the church, their children to be denied baptism and to receive confirmation instruction only on certain conditions. To make these measures effective the synod voted to introduce cards to show that the holders are bona fide church members.

Escape from church taxation is said to be the principal reason for the withdrawals. Every German citizen is assumed to be a member of the state church and is taxed for its upkeep. Formerly there were few withdrawals owing to the difficulties placed in the way of those wishing to do so and also to the social discredit that accompanied the act. But under a new law all a person has to do is to appear before a designated official and state his desire to give up his church membership. Thereafter he is exempt from the payment of church taxes.

After meeting a great number of people in my campaign I am convinced that the people are going to make a change in the office of County Trustee. The opposition to letting a man hold an office such as this for more than two terms, as my opponent, Mr. E. H. Crump, is trying to do, is based on sound reasons. One of these reasons is that it tends to build up an officeholding autocracy, setting the officeholders apart from the people and giving them too much power in dictating public affairs. In other words, if men holding such offices are not limited as to the number of terms, they form combinations among themselves and soon come to feel that instead of being servants of the people they are the masters. Consequently, rotation in office has become an American custom.

I am one who believes in the power of public opinion. I believe that when the people become aroused they can smash any political machine ever constructed. AND THEY ARE NOW AROUSED. I know from the people themselves, as I have met them in the shop, on the farm, in the store and office, that there is a deep, strong under-current against the political machine which will sweep things before it on election day.
